Hand Disinfection
instructions for use

Type of preparation: For application on the skin or for preparing compresses.

Therapeutic class: Disinfectant

Use of the preparation: Hygienic and surgical hand disinfection, skin disinfection before simple injections and punctures of peripheral vessels, skin disinfection before operations and before punctures of joints, disinfection of sebaceous skin, cool compresses.

Dosing instructions and indications for use: For hygienic hand disinfection, the hands should be rubbed with the solution and kept moist for 30 seconds. For surgical hand disinfection, the hands and the forearms should be rubbed with the solution and kept moist for 5 minutes. For disinfection before simple injections and punctures of peripheral vessels, the skin should be rubbed thoroughly with the solution and kept moist for 15 seconds. For disinfection before operations and before punctures of joints, the skin should be rubbed thoroughly with the solution and kept moist for 1 minute. For disinfection of sebaceous skin, the skin should be rubbed thoroughly with the solution and kept moist for 10 minutes. For cool compresses the solution should be applied diluted with equal parts of water.

Contraindications: The hand disinfectant is not suitable for open wounds.

Interactions with other medications: None known.

Side effects: Skin redness or a mild burning sensation may occur when the skin is rubbed with the hand disinfectant.

Warnings: Highly flammable! Keep away from sources of ignition! If the solution spills, take immediate action to prevent fire and explosion. Suitable action could include wiping up the affected area and washing down the residue with water, airing the room and shutting off all ignition sources.

Indications: Indicated times are minimum times. Longer exposure may be required in case of additional complications (e.g. moist or dirty skin, risk of the surgical procedure). The hand disinfectant does not have a sporicidal effect and is therefore not suitable for storing sterile instruments or syringes.

Composition: Each 100 g solution contains: 62.8 g 2-propanol, purified water
Indication: Keep tightly sealed. Registered in Germany acc. to German Medicinal Products Act. Registration number: 1599.98.99

Spectrum of activity: Bactericidal, tuberculocidal, fungicidal (Candida albicans), "virucidal with limited effectiveness" (effective against enveloped viruses, e.g. HBV, HIV, HCV), effective against noroviruses.

Exposure times: Bacteria and fungi (Candida albicans):
- Hygienic hand disinfection to VAH / DGHM and EN 1500: Conc. 30 s
- Surgical hand disinfection to VAH / DGHM and EN 12791: Conc. 1 min.
- TbB (Tuberculosis)-inactivation to EN 14348 (low bio load): Conc. 30 s
- Enveloped viruses (e.g. HBV, HIV, HCV) to RKI / DVV: Conc. 15 s
- Noroviruses to EN 14476: Conc. 30 s

Safety Instructions: H225 - Highly flammable liquid and vapour. H319 - Causes serious eye irritation. H336 - May cause drowsiness or dizziness. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly closed. Wear eye/face protection. IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a POISON CENTER or doctor/physician if you feel unwell. If eye irritation persists: Get medical advice / attention. Store in a well-ventilated place. Keep container tightly closed.

The completely emptied packaging can be recycled. Any remaining product must be disposed of separately under waste code number EAK 07 06 99.
